WHO IS MOBALT TECHNOLOGY?

Mobalt Technology Pvt Ltd serves its clients as a trusted ally, providing them with the loyalty of a business partner and the economics of an outside vendor. We make sure that our clients have what they need in order to run their businesses at peak performance levels, with maximum efficiency and reliability. Many of our information applications are mission-critical, so we assure our clients that we'll be there when they need us. We sell personal computer technology for small and large businesses including personal computer hardware, peripherals, networks, software, support, service, and training. Ultimately, we are selling information technology whilst we sell reliability and confidence. We sell the assurance to business people that their business will not suffer any information technology disasters or critical downtimes. The key strategy that works effectively for us is to brand the vision of our company as a trusted information technology ally to our clients. We will not be able to compete in any effective way with the chains using boxes or products as appliances but we offer a real alliance that feels personal. The benefits we sell include many intangibles: confidence, reliability, knowing that somebody will be there to answer questions and help at critical times as these are complex products that require serious knowledge and experience to use, which we have, while our competitors sell only the products themselves and not bother on following up on their clients.

OUR VISION

Maintain the core of the main product and service supply chain strategy which is to»

- Emphasize service and support
- Build a relationship business
- Focus on business and high-end home

OUR MISSION

Mobalt is built on the assumption that the management of information technology and general supplies for business is like legal advice, accounting, graphic arts, and other bodies of knowledge, in that it is not inherently a do-it-yourself prospect. Smart business people who aren't computer hobbyists need to find quality vendors of reliable hardware, software, service, and support and they need to use these quality vendors as they use their other professional service supplies as trusted allies and we aim at being the number one reliable company all over the world.

ICT CONSUMABLES

The best communicators really understand what efficient communication is and how new technologies should be used to make communication even more efficient. Expenditure on computer systems does not stop with the initial purchase of the hardware and software but various computer supplies and consumables are needed to keep a computer system operating. These include:

- Paper for printers, photocopiers and fax machines
- Ink and toner for printers, photocopiers and fax machines
- Lubrication oil for various machines with moving parts
- Spare replacement parts for various items
- storage disks of various kinds, such as floppy disks, tapes and CDs
- Cables of various kinds
- Cleaning materials
- Tools for maintenance purposes

ICT CONSUMABLES

In partnership with many name brand manufacturers of ICT equipment and consumables, Mobalt brings you the widest range of ICT equipment and supplies. Our volume buying power allows our clients to stretch their ICT budget.

- Computers, Scanners, and Printers
- Laptops, Monitors, and Memory
- Digital Signage, Video walls
- Advance LED Products
- Cameras and Camcorders
- Network Appliances
- Cables and other IT consumables
- Electronic Backup Devices
- Secure Storage Systems
- Software
